

A fast path to increase your cash flow at scale

Businesses often struggle with short-term cash flow constraints, which inevitably slow down growth and investment opportunities. And as treasury leaders know, those cash flow issues are being exacerbated by shorter payment cycles, supply chain disruptions, and rising capital costs.

But it doesn’t have to be like that. When approached in the right way, a working capital management (WCM) strategy can help treasury leaders free up cash, strengthen supplier relationships, and drive agility. **Here’s how Taulia can help with that.**

1. Proactive visibility into cash flow

With Taulia’s easy-to-use working capital dashboard, you get real-time visibility into cash flow throughout your business and across your supply chains. That visibility means you’re never in the dark. And as a treasury leader, it allows you to work with the CFO and procurement to optimize payment terms, liquidity, and supplier support.

The Taulia Impact

“We saw at least a 2.5x ROI over and above making investment decisions on our cash, borrowing in the market, including spending money on the program itself.”

Project, Bank and Cash Manager, SASOL.

2. Expert guidance for smarter decision-making

We do more than support working capital management (WCM) efforts with the right technology. We also provide you with best practices and support based on working with thousands of leading global businesses. As required, we can design and implement every stage of your WCM program. And we can support your ESG goals by helping you provide suppliers with financial incentives to act with sustainability in mind.

The Taulia Impact

“We expect to achieve annual savings of \$1.5–2 million. We’ve been surprised how enthusiastic our suppliers have been. The process is completely transparent and gives us reporting that was previously unavailable to us.”

VP Distribution Operations, Dominion Energy.

3. A global network of suppliers and lenders

Comprised of millions of businesses, our network helps connect buyers, suppliers, and funders under one umbrella. You can tap into this network to connect with a wide range of banks and NBFIs, allowing you to more efficiently manage your cash flow. And we can support you on that journey, helping you achieve real financial growth in a streamlined and scalable way.

The Taulia Impact

“With any supply chain financing solution, you need to make sure that the bank[s] backing the solution are comfortable with the documentation that is in place in the front end. Having [client funding partners] joined up with Taulia at the back end, and comfortable with the documentation, is a significant additional benefit.”

Treasury Director, Bridgestone.

Quickly increase cash flow at scale

An effective WCM strategy can eliminate long-standing barriers to growth. And from the perspective of treasury leaders, it can help optimize cash flow, mitigate risk, and ease the pressure on liquidity planning — while freeing them up to support corporate growth objectives.

Do it with Taulia

At Taulia, we help thousands of companies with WCM through our technology, industry know-how, access to our global financial network.
