Supplier management streamlines and simplifies your AP processes

You need accurate and up-to-date supplier information and your suppliers need updates on their purchase orders, invoices and payments. Empower your suppliers with self-service access and reduce the burden on you and your team.

Curtail fraud
By using multiple indicators of fraud and scoring them we can identify if changes to the vendor file warrant further attention. Stop fraud dead in its tracks before any payments go out.

Save time and hassle
Submitting invoices is easy for your suppliers and easy for you. With everything in one place your suppliers can quickly get and exchange information with you.

Reduce call volumes
No more having to man the phones to provide status updates. No more phone calls to correct errors or answer questions as all exchanges can take place electronically.

Provide complete visibility
Suppliers now know when to expect payment and can fully see any status updates or investigate any issues with any pending invoices.

1M supplier interactions processed daily

120+ of the world's biggest brands benefit from Taulia's solutions
